The day we've been waiting for is here!

It's been nearly two years and not once have We The People had the opportunity to express our concerns and thoughts about the COVID measures to our representatives in the form of public hearings. NC advocates have asked our legislators to hold public hearings and thus far we have been ignored.

In lieu of the public hearings that should have taken place at the General Assembly, PAVE and 2 Citizen Moms in conjunction with HEALNC are holding a Summit on Saturday, October 30, in Raleigh. Every NC legislator will be invited to attend.

The summit will give NC doctors, nurses, other medical professionals and citizens an opportunity to testify about issues such as:

- Disparate treatment of vaccinated and unvaccinated patients
- Doctors being threatened for "COVID misinformation" and prescribing Ivermectin and Hydroxychloroquine
- Limiting doctors' treatment options to only CDC protocols
- The damage being caused by Remdesivir and ventilators
- Vaccine injuries and deaths and the lack of reporting to VAERS
- Censorship of effective treatment options and vaccine side effects
- The impact of masks on human health
- Disparate treatment of unvaccinated medical staff
- The refusal to honor medical and religious exemptions

The summit will also provide an opportunity for those injured by the COVID vaccine and hospital protocols to be heard.

Here are the details for those who would like to attend:
What: Medical Freedom Summit
Who: NC doctors, nurses, scientists, other healthcare workers and citizens
When: Saturday, October 30, from 10:00 a.m. to 4:00 p.m.
